Atlantic Retail Properties *Jupiter, FL*

- Produced a wide array of marketing materials in support of brokers.
- Ran demographic analysis reports and created new analytic program.
- Managed the website and conducted email marketing campaigns.
- Wrote and edited copy for marketing flyers and email blasts.

PROJECTS

AI Content Analysis Tool Developed a Python tool using OpenAI and Anthropic APIs to analyze and standardize content across digital publications.

Local LLM Integration Implemented local AI models with Ollama for internal content processing, reducing reliance on external APIs and improving data security.

Auto Emailing Tool Built a tool which automatically sends emails when a deadline approaches a certain threshold by using Visual Basic, which saved users a lot of time and manual effort.

Custom Reports Tool Created a module that generates custom reports for Metadata.

Auto deleting Tool Developed a tool which runs every 15 minutes from 9 a.m. to 5 p.m. and automatically deletes problematic files. This was previously done manually and is a huge time saver.
